At CVCA Cardiac Care for Pets, we hear every day from families of patients who weren't expected to have the length and quality of life that they have enjoyed under our care. We know your pet is an important part of the family, and we are here to provide the highest level of care.

The benefits of bringing your pet to CVCA are that your pet will receive a complete cardiac exam with immediate diagnosis including blood pressure, review and interpretation of medical history, radiographs, and lab work while accompanying your pet for the echocardiogram – all by a board-certified cardiologist.

🐾 Customized Care

- We understand **each family is unique** and strive to work with you and your primary care veterinarian to ensure the best possible outcome for your pet with a treatment plan that works for you.
- We ensure that you spend ample time with the cardiologist to get an accurate diagnosis and to thoroughly discuss all treatment options.

🐾 Exceptional, Compassionate Service

- Service and compassion are of utmost importance to us and it shows in your experience. **Over 99% of our clients would recommend us to a friend or family member.**
- You remain with your pet for the examination and testing so that the cardiologist can show you exactly what is happening in your pet's heart. This gives you an **immediate diagnosis and opportunity to discuss treatment options.**
- Our care doesn't end when you leave. Our team maintains ongoing communication with your primary care veterinarian regarding your pet's health.
- **CVCA cardiologists are available via phone 24 hours a day, 7 days a week to emergency and primary care veterinarians for assistance with patient care.**

🐾 Training and Experience

- CVCA's board-certified cardiologists have completed **three to five years of specific cardiac training post-veterinary school** graduation and must demonstrate exceptional expertise in cardiology through a series of extensive examinations.
- Our doctors have extensive training in the proper techniques and interpretation of echocardiograms, and other cardiac diagnostics, resulting in **higher accuracy in imaging and measurements, creating the best chance for successful treatment for your pet.**

🐾 Leading Edge Diagnostics and Treatment

- All ultrasound machines are not created equal – **only specific cardiac equipment can ensure that your pet receives the most accurate diagnosis and best treatment plan.** We utilize the top of the line Philips pediatric echocardiography units, which utilizes the latest technology and software for accuracy in measurements and images, and is geared for the higher heart rates of our pets.
- CVCA offers opportunities to participate in **cutting edge cardiac drug trials and research**, providing more opportunities for treatment for your pets.

🐾 Value and Flexibility in Payment

- Our full cardiac workup is affordable and offers your pet the best chance of accurate diagnosis to minimize ongoing and unexpected veterinary costs.
- Our office is available to provide an estimate for your pet's needs. **We accept all major credit cards, cash, checks, Apple Pay, Google Pay, Scratchpay and CareCredit.**

Patients with congestive heart failure live 75% longer when co-managed by a board-certified veterinary cardiologist and primary care veterinarian than those whose care does not include a board-certified cardiologist.
